# MILES PHAN

**(818)-599-5809 | milespha@usc.edu**

## Education

**University of Southern California**/In Progress
Los Angeles, California/Expected Graduation May 2021

- B.S. in Computer Engineering Computer Science. 3.84 GPA

## Skills

- **Coding**: Proficient in Python, C/C++, PHP, C#, Java, JavaScript, jQuery, HTML5, CSS, SQL.
- **Technologies/Environment**: Linux, Windows, Git/GitHub, Docker, PostgreSQL, MySQL, Apache Tomcat, Flask, Django, Bootstrap.
- **Hardware**: Raspberry Pi, Arduino UNO, Xilinx FPGA, and GrovePi programming experience.
- Knowledge of UML, Waterfall/Agile methodologies, design patterns, and distributed systems.

## Work Experience

**NASA Jet Propulsion Laboratory/**Software Development Intern
February 2020 - Present/Pasadena, California

- Contributed to the revamp of the JPL Education Portal, the site for JPL uses to manages potential new hires and interns.
- Developed and shipped an internal work-on-lab approval app in response to the COVID-19 pandemic.
- Upgraded an internal part information app to display data coming from other JPL sites.

**University of Southern California/**Research Assistant
February 2020 – May 2020/Los Angeles, California

- Analyzed voter registration and patent data to find links between political party affiliation and innovation.

**University of Southern California/**Course Producer
August 2019 - Present/Los Angeles, California

- Led labs and hosted office hours about coursework and web development concepts.
- Managed student final project designs.

**Pepperdine University/**Application Development Intern
May 2018- August 2018/Malibu, California

- Developed an Out of Office application that standardized team calendars.
- Upgraded a network emergency handler application reducing event response time by 75%.

## Activities

**APASS PEER Program**/Mentor
January 2019 - Present/Los Angeles, California

- Mentored incoming freshmen and helped them acclimate to life at USC.

**Joint Educational Project**/Student Teacher Assistant
January 2019 – May 2019/Norwood Street School

- Conveyed computer science principles to 30 third grade students over 8 weeks
- Spearheaded lesson planning, coordinated meetings, and laid out learning objectives

## Personal Projects

**SciOlyScheduler**

- A console app built for Yale Science Olympiad that matches proctors to events using a modified Edmond-Karp algorithm that reduced computation time by 90%.

**RaspberryPi Security System**

- A distributed system that alerts its owner of a trespassing through email and SMS.

**TwitchAnalyzer**

- A standalone app where users can create categories based on channel emotes and analyze Twitch VOD comments to find and view clip-able moments.

## Awards

- **First Place in Boeing's Freshman Engineering Design Challenge**
- **Viterbi Dean's List Fall 2018 - Present Recipient**
